

Ready to modernize your brokerage?

G2Mint's AI-native platform makes your brokerage faster, smarter, and more profitable.

Run your whole brokerage on Miles as your TMS — or overlay the systems you already have. Open, API-first architecture means no rip-and-replace, and it flexes to exactly how your team works. We built our Freight Automation Engine and integrated TMS to meet the biggest needs of brokers today.

01 · We Deliver The Outcomes Brokers Need

Everything a modern brokerage needs to quote faster, protect margin, and move more freight.

Faster Rating and Quoting

Unify spot & contract rates from all sources (including email) without manual rekeying. Open APIs make it easy to send quotes in real time

Protected Margins

Agreement Logic guarantees pricing consistency, automatically applying all markups and accessorials at the time of booking, ensures carrier selection is always accurate & profitable

Unlock Trusted Capacity

Access pre-vetted carriers across all transport modes via integrated qualification tools (Highway and more)

Unified Multimodal Intelligence

Compare every mode and rate against a single shipment in a single environment. All modes, one platform - Parcel, LTL, TL, Internodal

Automate and Scale

Use AI to automate carrier selection, tendering and settlement — grow without increasing headcount and always choose the optimal carrier

New Freight Opportunities at Low CAC

Instantly connect with shippers and deliver your contract and spot rates across the entire G2Mint ecosystem

02 · Grow Your Book - Say Yes More. Win More.

Flexible engagement models plus a network that compounds your capacity and freight opportunities.

BROKERS & CARRIERS ON YOUR TERMS

Let Shippers Use Their Own Carriers

Shippers keep their own contracts & rate structures alongside your broker managed rates - best of both worlds

Provide Broker Managed Services

Run shippers' freight end-to-end on their behalf or augment their teams for compliance, auditing, settlement, and daily operations

Transparent and Flexible Pricing

Easily configure broker-funded, shipper-funded, or hybrid models that removes the friction to engage and fits your shippers' operational needs

THE ECOSYSTEM ADVANTAGE

Find More Capacity

Tap vetted carriers, backhauls, & build round-trips across the network. Empower owner-operators with direct access to manage rates in your TMS

Accelerate Shipper Adoption-Win More Freight

Instant access to G2Mint shippers and eliminate negotiation cycles by delivering blanket or spot rates directly to the G2Mint network

Unlock Network Opportunities

Share route data to orchestrate round-trip tenders and multi-stop loads with other network brokers and shippers

03 · Two Paths To A Modern Brokerage

The right path depends on what your business needs — enhance the systems you already rely on, or move to a complete platform built to run your brokerage. Both run on the same AI-native Freight Automation Engine and open API architecture.

Miles Boost

Modernize & connect · Overlay your stack

- ✓ Open APIs, web-service proxy & plugins
- ✓ Augment existing systems — no rip-and-replace
- ✓ Connects all your apps & plugins
- ✓ Automate rating, booking, tracking & settlement

MOST BROKERS

Miles Command

The full platform · Ready to run

- ✓ Everything in Boost, plus a full TMS
- ✓ Complete AI-native TMS — runs out of the box
- ✓ AI-guided for any skill level
- ✓ Workflow automation enabled
- ✓ ROI routing & analytics
