

Ready to modernize your freight operations?

G2Mint's AI-native platform makes your transportation faster, smarter, and less expensive.

Run all your transportation on Miles as your TMS — or overlay the systems you already have. Open, API-first architecture means no rip-and-replace, and it flexes to exactly how your team works. We built our Freight Automation Engine and integrated TMS to meet the biggest needs of shippers today.

01 · We Deliver The Outcomes Shippers Need

Everything you need to rate faster, reduce COGS, and scale freight operations.

Get Rates Faster

Unify spot and contract rates from all sources (including email) so you can rate faster without manual rekeying slowing you down

Increase Carrier Performance & Resolution

Resolve issues faster and make better decisions by centralizing schedules, email threads, and communication in your workflow

Unlock Trusted Capacity

Access pre-vetted brokers and carriers across all transportation modes via integrated qualification tools (Highway and more)

Unified Multimodal Intelligence

Compare rates across every mode against a single shipment in one platform - Parcel, LTL, TL, and Intermodal

Automate and Scale

Use AI to automate carrier selection, tendering, and settlement - grow without increasing headcount and always choose the optimal carrier

Future-Proof Connectivity

API-first architecture for seamless, scalable data integration - easily connect to everything today and in the future

02 · The Ultimate Engagement Model for Shippers

Flexible engagement designed to compound capacity and unlock network efficiency.

BROKERS & CARRIERS ON YOUR TERMS

Bring Your Own Rates

Maintain existing carrier contracts & agreements alongside your broker-managed relationships

Leverage Broker Managed Services

Augment your team with managed services for compliance, auditing, settlement, and other daily operations

Configure Your Tech Funding

Select subscription, pay as you go, broker-funded, or hybrid models

THE ECOSYSTEM ADVANTAGE

Expand Your Capacity

Get instant, friction-free access to our network of pre-vetted carriers and brokers

Streamline Execution

Eliminate negotiation cycles with automated spot rates from our network & empower owner-operators to manage rates in your TMS

Unlock Network Opportunities

Share route data for round-trip tenders and multi-stop loads with other network shippers

03 · Two Paths To Modern Freight Operations

The right path depends on what your business needs — enhance the systems you already rely on, or move to a complete platform built to run your entire operations. Both run on the same AI-native Freight Automation Engine and open API architecture.

Miles Boost

Modernize & Connect · Overlay your stack

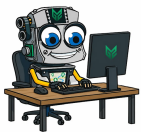

- ✓ Open APIs, web-service proxy & plugins
- ✓ Augment existing systems — no rip-and-replace
- ✓ Connect your apps and plugins
- ✓ Automate rating, booking, tracking & settlement

Miles Command

The Full Platform · Ready to run

- ✓ Everything in Boost, plus a full TMS
- ✓ Complete AI-native TMS — runs out of the box
- ✓ AI-guided for any skill level
- ✓ Workflow automation enabled
- ✓ AI reporting & analytics
